SKILLSET

Front-end: JavaScript, HTML, CSS, React
Back-end: Node.js, Express, Python
AWS: S3, EC2, Lambda, Cloudformation
Coaching and Facilitating Agile Practices, Building Communities of Practice

EXPERIENCE

Nike, Beaverton, OR

Sr. Scrum Master 1/20 - present
Coach teams to be autonomous, facilitating their own Scrum ceremonies
Facilitate team of teams ceremonies as a SAFe RTE, feature intake and planning for 7 teams
Advocate for developer community, teaching others how to make best use of community

Scrum Master 6/17 - present
Facilitated Scrum ceremonies, encourage agility and continuous improvement for CiC teams
Wrote Python Lambdas to collect and summarize JIRA data to S3
Created dashboards with React to display agile metrics and value drop progress
Led community of practice meetups to share and develop skills

Scrum Master (ETW, Mainz-Brady Group) 4/16 - 6/17
Facilitated agile practices for the DTC Core Components and Architecture teams
Created a Node EC2 app to log Hystrix events to Splunk, deployed with Keystone pipeline

Eleven Wireless, Portland, OR

Scrum Master/Software Engineer 5/15 – 4/16
Facilitated all Scrum ceremonies and artifact creation for the ElevenOS development teams
Managed JIRA settings to suit the team's needs

Software Engineer 4/14 – 5/15
Wrote, tested, and maintained RESTful C# web services for ElevenOS
Updated SQL stored procedures
Set up Route53 entries and Cloudfront distributions for portals
Added attributes to RADIUS messages for new network device integrations

Web Developer 4/13 – 4/14
Added multilingual support and responsive design to a WYSIWYG CMS
Built complex network management tools to customers' strict requirements
Improved usability and maintainability of ASP.NET interfaces by rewriting with AngularJS
Maintained S3 buckets, Route53 entries, and MaxCDN configurations for portals

Jr. Web Developer 7/12 – 4/13
Customized portal pages with HTML, CSS, JavaScript, jQuery for guest computer and network access
Created brand templates for non-developers to build custom portals easily
Built a Python script to automate portal deployment that integrated with Amazon S3 and MaxCDN
